

Jhon Anthony A. Varron

This project simplifies exam result processing by letting instructors scan paper-based tests using their smartphones. Results are instantly uploaded to the web system, where students can conveniently track their performance, study focus areas, and personalized feedbacks.

The primary responsibilities of the application:

- 1. The instructor will scan the exam paper for automatic checking.
- 2. The system will generate score result from scanned exam papers.
- 3. Users will have access to topic-wise score reports to determine strengths and weaknesses.
- 4. The instructor will send personalized feedback to students based on the analytics.
- 5. The system automatically notify student once the exam score released.

Other desired features of the application:

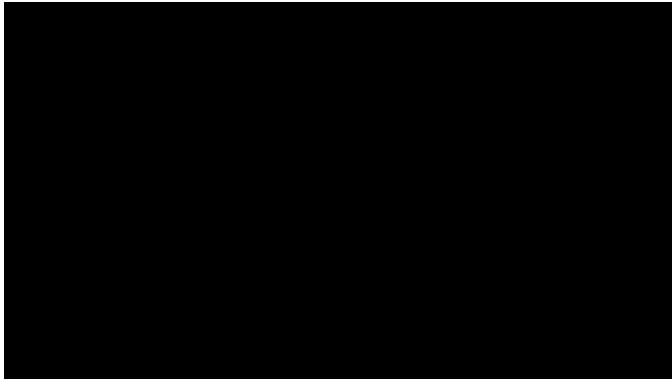

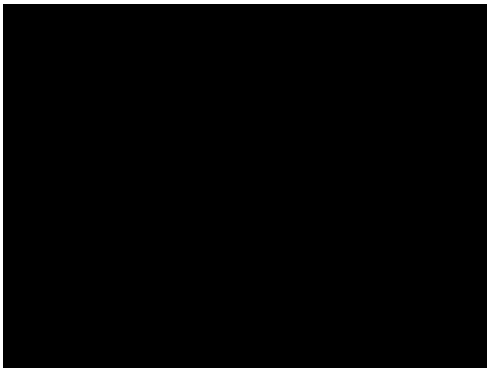

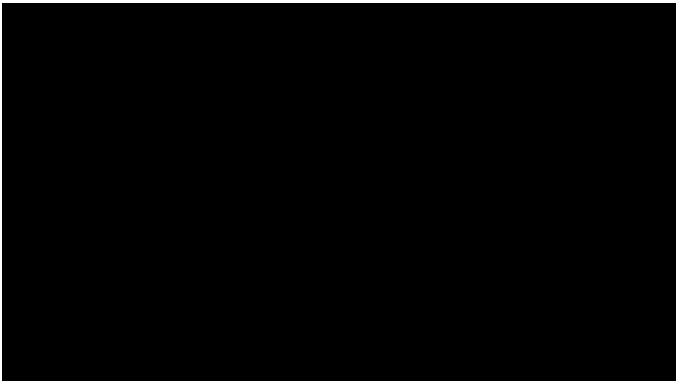

- 1. The system will generate an account to students upon registration.
- 2. Only authenticated users will access exam results.
- 3. The system will read 100 percent shaded answers correctly.
- 4. The system will process exam result within 30 seconds after upload.
- 5. The system will handle multiple concurrent scans and result updates.
- 6. The website will be responsive to any device and simple for the users.

	#		()
UR1	FR 1.1	Exam Paper Scanner	The instructors shall use mobile-compatible scanner interface to scan exam papers using existing image recognition technology.
UR2	FR 2.1	Result Processing	Compare scanned answers from the stored answer keys and automatically compute the total and per-topic scores before storing the results in the database.
UR3	FR 3.1	Exam Analytics	Generates topic-based performance analytics for each exam and allow filtering of reports by exam topic. Only

			authorized users can access their own reports.
UR4	FR 4.1	Feedback Management	The instructors shall have a feedback interface to input and save feedback/recommendation per student and per exam. It shall be store in the student's record.
UR5	FR 5.1	Notification Alert	Generates notification after an instructor finalizes exam results via email. It includes the exam title and result summary in the notification

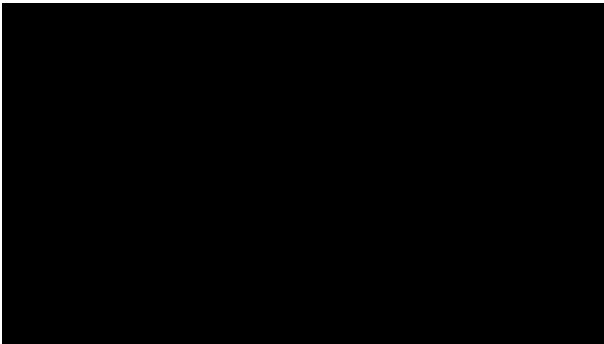

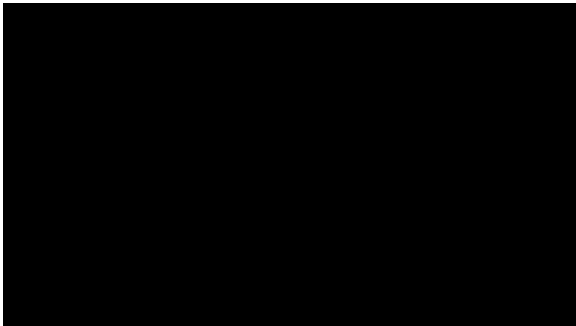

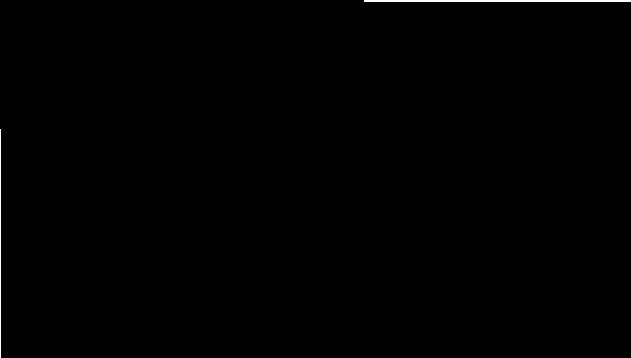

,

□ This is my first official interview with my client, the head of the VSU-Review Center, Ms. Jade Compendio. The purpose of this visit is to gather initial document/s and feature/s that is required in order for the system to complete and successful.

,

□ This is the second round of my interview with my client. The purpose is to clarify some ambiguity, inconsistencies, and gaps in the requirements.

Ma'am Jade,

Good day!

The project concept "Development of a Web-based Mock Board Exam Progress Tracker" has been approved. Should we work out for an interview schedule? Kindly prepare the required documents for a seamless requirements gathering and clear software output. Thank you.

Regards,

Jhon Anthony Varron

Ma'am Jade,

Good day!

Apologize for messaging you again, but may I request to conduct a follow-up interview today to clarify some questions and define my scope of work? Thank you.

Regards,

Jhon Anthony Varron

Ok ma'am. I'll be there at 10:30.

- Create mock exam in the system by manual. It must be a ZipGrade-like scanner.

- This must be the result after scanning the exam paper.

With your free account, you may grade up to 100 papers each month. You have 96 papers remaining. Need more? Buy 1 Year of Unlimited Grading: \$6.99
